My first pull request

Tobias Schaffner

Agenda

- Register at Github

- Install git

- Fork the project

- Add your changes

- Create the pull request

Register at Github

https://github.com/

You can use this account to register for Hacktoberfest afterwards:

https://hacktoberfest.digitalocean.com/

Install git

Windows:

https://gitforwindows.org/

Debian based Linux:

sudo apt-get install git

Mac (Homebrew):

brew install git

Fork the project

Go to the project and create a fork:

https://github.com/HacktoberfestMunich/MyFirstPR

New shell or git-bash:

git clone https://github.com/<YourName>/MyFirstPR.git

Change into the repository

cd MyFirstPR

Add your changes

Create a new branch:

git checkout -b my_changes

Add your name to the README.md at the right section and commit your changes:

git commit -a

Push your changes:

git push --set-upstream origin my_changes

Create the pull request

Create a pull request with the branch you created as origin and the master of the original repository as target.

Compare & pull request
